

LEAD GEN · AGENCY

LinkedIn DM ICP Scorer

Claude reads every inbound DM, scores it 0-100 against your ICP, pings Slack only when a real lead lands.

THE PROBLEM

Your inbox is a tax on your day.

40-100 DMs a week. 70% pitches, 20% job seekers, 10% maybe-buyers. The buyers look identical to noise. Either you check constantly and lose an hour a day, or you batch weekly and the warm reply goes cold. Both leak revenue. LinkedIn won't fix this — put an LLM in front instead.

FOUNDER HOURS / YEAR

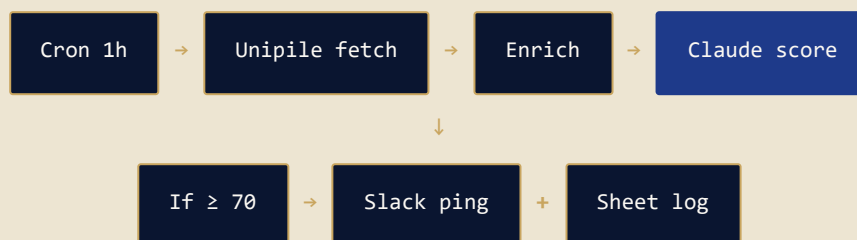

70%

DMS THAT ARE NOISE

Built for

- Solo founders + 2-10 person agencies (LI-heavy inbound)
- SaaS founders running founder-led sales
- Coaches / consultants with > 10K LI followers

The flow

BUILD IT

Stack & setup

Tech stack

LAYER	TOOL	COST/MO
Orchestration	n8n (self-host / cloud)	\$6-20
LinkedIn access	Unipile API	\$39
LLM scoring	Claude Sonnet 4.6	\$5-15
Alerts + log	Slack + Google Sheets	\$0
Total	—	\$50-80

Before you import

- n8n instance (self-host DO \$6/mo OR n8n.cloud trial)
- Unipile account + LinkedIn connected (\$39/mo after 7d trial)
- Anthropic API key with \$20+ credit
- Slack channel #li-hot-leads + bot token
- Google Sheet with columns: scored_at, sender_name, sender_url, icp_score, tier, reason, dm_text, tags

Setup (45-90 min fresh, 20 min if n8n already wired)

1. Spin up n8n: `docker run -d -p 5678:5678 n8nio/n8n` or n8n.cloud
2. Unipile → connect LinkedIn → copy account_id + API token
3. n8n credentials: add Header Auth (Unipile), Anthropic API, Slack OAuth, Google Sheets OAuth
4. Workflows → Import from Clipboard → paste JSON from page 4
5. Bind each red-flagged credential in the imported nodes
6. Replace REPLACE_ME_SHEET_ID + edit Claude prompt with YOUR ICP definition
7. Execute once manually → verify Slack + Sheet → activate workflow

Skill level: Beginner-to-intermediate. No code beyond pasting credentials + ICP text.

COPY + PASTE

n8n workflow JSON

Copy from GitHub →
