LinkedIn Comment → DM Auto-Trigger

Someone drops a keyword in your post comments. n8n picks it up, fires a personalized DM with the lead magnet, logs the lead. Works around LinkedIn's lack of native comment-to-DM.

THE PROBLEM

Your viral post got 400 comments. You converted 6.

You ask 'comment SCALE and I'll send you the playbook'. 400 people comment. You sit there for 3 hours copying names, opening DMs, pasting the link. By comment 50 you give up. The other 350 think you ghosted them. You burned the goodwill of your best post of the quarter. Native LinkedIn has no comment trigger. You don't need one — you need n8n plus Unipile to do it for you while you sleep.
