

SALES · FOLLOW-UP

Voice-Note Follow-up (ElevenLabs Clone)

Cloned-voice WhatsApp voice notes sent automatically after a discovery call. Sounds like you, costs cents, lifts reply rates without you ever opening WhatsApp.

THE PROBLEM

The follow-up problem nobody fixes: it sounds like a robot.

You had a great call Tuesday. You meant to follow up Wednesday. It's now Friday and you send a tired template email at 4pm. Reply rate is 12%. Meanwhile a WhatsApp voice note from a real human gets opened 90% of the time and replied to 40%. The catch is you can't send 30 voice notes a week by mouth. ElevenLabs clones your voice once. n8n triggers a fresh, personalized 25-second voice note within 2 hours of every call ending.

3.5x

REPLY LIFT VS EMAIL FOLLOW-UP

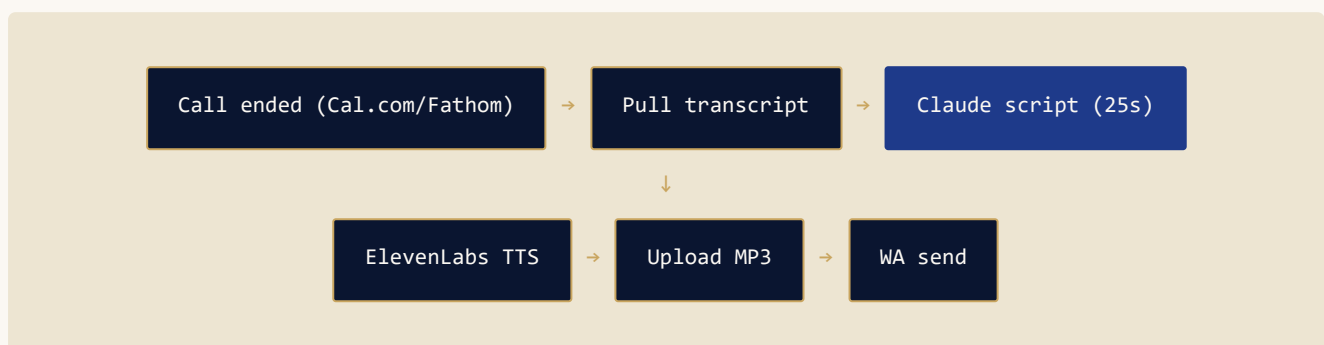

\$0.40

COST PER PERSONALIZED VOICE NOTE

Built for

- Founders doing high-ticket calls (\$3K+ engagements)
- Coaches and consultants who run discovery calls + propose later
- Agencies in MENA / LATAM / SEA where WhatsApp is the default sales channel

The flow

BUILD IT

Stack & setup

Tech stack

LAYER	TOOL	COST/MO
Orchestration	n8n (self-host / cloud)	\$6-20
Call source	Cal.com webhook + Fathom/Fireflies transcript	\$0-20
Script LLM	Claude Sonnet 4.6	\$2-6
Voice clone TTS	ElevenLabs (Creator tier)	\$22
WhatsApp send	WhatsApp Cloud API or 360dialog	\$0-15
Total	—	\$30-83

Before you import

- n8n instance running and reachable
- ElevenLabs account with a cloned voice ID (5 min of clean audio gets you a good clone)
- Call platform with transcript export — Fathom free or Fireflies free both work
- WhatsApp Business API access (Cloud API direct or via 360dialog/Twilio)
- Anthropic API key with \$10+ credit
- Lead's phone number captured at booking (Cal.com / Calendly custom field)

Setup (90 min including voice clone training)

1. Clone your voice in ElevenLabs: upload 5-10 min of clean audio, name it, copy the voice ID
2. Set up Cal.com webhook (or Calendly) to fire on 'meeting ended' to your n8n webhook URL
3. n8n credentials: Anthropic API, ElevenLabs API (Header), WhatsApp Cloud API token
4. Workflows → Import from Clipboard → paste JSON from page 4
5. Edit Claude prompt with YOUR offer, tone, and the 25-second structure you want
6. Replace REPLACE_ME_ELEVENLABS_VOICE_ID with your cloned voice ID
7. Trigger a test call → verify MP3 generates + WhatsApp delivers within 2 hours → activate

COPY + PASTE

n8n workflow JSON

**Copy from GitHub →**

One click. Opens raw file with native copy button.
