

CONTENT · AEO

AEO Citation Monitor (4 LLMs)

Daily check across Claude, ChatGPT, Perplexity, and Gemini for your brand and competitor mentions. Logs every cite, every position, every delta. Slack ping when you gain or lose ground.

THE PROBLEM

You can't optimize for AI search if you can't see it.

Google Search Console shows you Google. It shows you nothing about Claude, ChatGPT, Perplexity, or Gemini — which is where 30% of your future buyers will discover you. You don't know if a competitor was cited above you yesterday. You don't know if your last blog post moved any model. You're flying blind in the channel that's eating organic. Run the same 30 prompts every morning, store the answers, diff them weekly. That's AEO measurement.

30%

BUYER JOURNEYS TOUCHING LLMS

4hrs

MANUAL CHECKS / WEEK (GONE)

Built for

- Agencies selling AEO/GEO/LLMO services who need real reporting
- B2B SaaS where buyers research with ChatGPT and Perplexity
- Content teams who want to prove their work moves LLM rankings

The flow

BUILD IT

Stack & setup

Tech stack

LAYER	TOOL	COST/MO
Orchestration	n8n (self-host / cloud)	\$6-20
LLM 1 - Claude	Anthropic API	\$3-8
LLM 2 - ChatGPT	OpenAI API	\$3-8
LLM 3 - Perplexity	Perplexity API	\$5
LLM 4 - Gemini	Google AI API	\$0-5
Storage + alerts	Google Sheets + Slack	\$0
Total	—	\$17-46

Before you import

- n8n instance running on a server (this hits 120+ API calls/day)
- API keys for all 4 LLMs (Anthropic, OpenAI, Perplexity, Google AI Studio)
- Google Sheet with 2 tabs: `<code>prompts</code>` (your 30 tracked queries) and `<code>log</code>` (daily results)
- Your brand name + 3-5 competitor brand names to track
- Slack channel `#aao-alerts` + bot token
- Roughly \$20-50/mo combined LLM credit for 30 prompts × 4 models × 30 days

Setup (2hrs first time including 4 API signups)

1. Create your Google Sheet, populate prompts tab with 30 buyer-intent queries (e.g. 'best CRM for solo founders')
2. Generate API keys for all 4 LLMs and add \$10-20 credit to each
3. Spin up n8n on a server (this is a daily-running flow — local laptop won't cut it)
4. n8n credentials: Anthropic, OpenAI, Perplexity (Header Auth), Google AI, Sheets OAuth, Slack OAuth
5. Workflows → Import from Clipboard → paste JSON from page 4
6. Edit the parser: add your brand name + competitors to the citation extraction logic
