Competitor blog → my-angle draft

RSS pulls every fresh competitor post, Claude rips it apart and drafts YOUR contrarian angle in Google Docs before they finish coffee.

THE PROBLEM

Every competitor post is a missed counter-punch.

Your top 5 competitors publish 8-15 posts a week. You skim two on Monday, save four to read-later, ignore the rest. By the time you write a response, the topic is cold and Google has indexed everyone but you. The real play is not copying — it is publishing the contrarian angle within 24 hours while the keyword has heat and the SERP is thin.

8-15

POSTS/WK YOU MISS

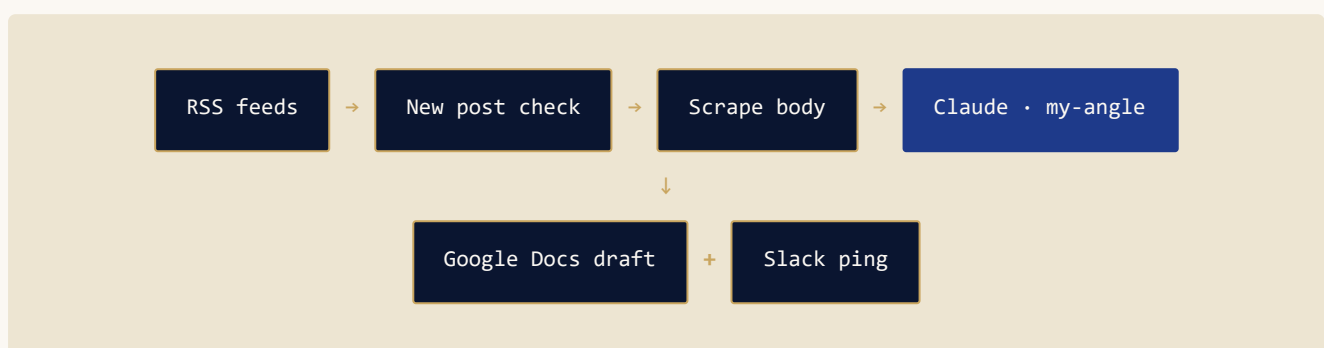

<24h

WINDOW BEFORE SERP LOCKS

Built for

- Founder-led B2B blogs in a noisy niche (SaaS, marketing, dev tools)
- Solo SEO operators managing 3-10 client blogs
- Content leads at agencies who need 4+ drafts per week

The flow

BUILD IT

Stack & setup

Tech stack

LAYER	TOOL	COST/MO
Orchestration	n8n (self-host / cloud)	\$6-20
RSS + scrape	n8n RSS + Firecrawl	\$0-19
LLM angle	Claude Sonnet 4.6	\$8-25
Draft store	Google Docs + Slack	\$0
Total	—	\$15-65

Before you import

- n8n instance (self-host DO \$6/mo OR n8n.cloud trial)
- RSS URLs for 3-10 competitor blogs (most WordPress sites add /feed)
- Firecrawl API key (free tier 500 scrapes/mo) OR built-in HTTP node
- Anthropic API key with \$20+ credit
- Google Docs OAuth + a target folder ID
- Slack channel #content-drafts + bot token

Setup (30-60 min fresh, 15 min if n8n already wired)

1. Spin up n8n: `docker run -d -p 5678:5678 n8nio/n8n` or n8n.cloud
2. Collect 3-10 competitor RSS URLs in a text file (most blogs = domain.com/feed)
3. n8n credentials: add Anthropic API, Google Docs OAuth, Slack OAuth, Firecrawl Header Auth
4. Workflows → Import from Clipboard → paste JSON from page 4
5. Edit the RSS Feed Read node → paste your competitor URLs (one per item)
6. Replace REPLACE_ME_GDOCS_FOLDER_ID + edit the Claude prompt with your brand voice + niche
7. Execute once manually → verify Google Doc appears + Slack ping fires → activate workflow

Skill level: Beginner. Paste credentials, drop your RSS list, run.

COPY + PASTE

n8n workflow JSON

Copy from GitHub →

One click. Opens raw file with native copy button.
