YouTube transcript → 9 assets

Drop a YouTube URL, get a blog post, LinkedIn carousel, X thread, IG hook stack, newsletter, 5 quote cards, FAQ schema, and a podcast SRT — in one run.

THE PROBLEM

One video, nine repurpose tabs, six hours gone.

You record a 20-minute video. Then your team spends a full day chopping it into a blog, a thread, a carousel, a newsletter, quote cards, captions. Most weeks the chopping never finishes, so the video lives on YouTube and dies there. The asset gap between record and repurpose is where 80% of the reach leaks out.

6h

REPURPOSE / VIDEO

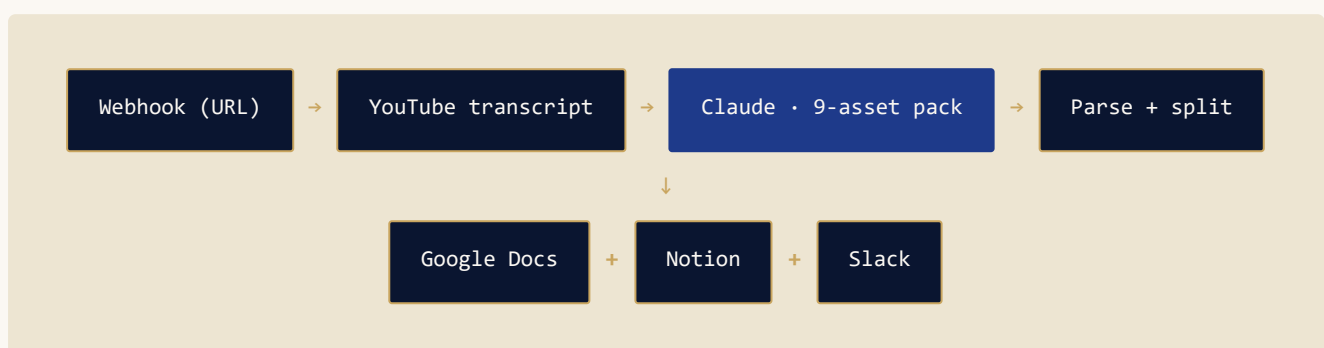

9

ASSETS PER RUN

Built for

- Solo creators with a YouTube channel + a newsletter or blog
- B2B founders running a podcast / video show 1-4 times a month
- Agencies repurposing client video into multi-platform packs

The flow

BUILD IT

Stack & setup

Tech stack

LAYER	TOOL	COST/MO
Orchestration	n8n (self-host / cloud)	\$6-20
Transcript	Supadata API or yt-dlp	\$0-15
LLM pack	Claude Sonnet 4.6	\$10-30
Storage	Google Docs + Notion + Slack	\$0
Total	—	\$16-65

Before you import

- n8n instance (self-host DO \$6/mo OR n8n.cloud trial)
- Supadata API key (free 100 transcripts/mo) — or self-host yt-dlp endpoint
- Anthropic API key with \$20+ credit
- Google Docs OAuth + target folder ID for blog drafts
- Notion integration token + a database ID for the asset library
- Slack channel #repurpose-out + bot token

Setup (45-75 min fresh, 20 min if n8n already wired)

1. Spin up n8n: `docker run -d -p 5678:5678 n8nio/n8n` or n8n.cloud
2. Sign up for Supadata.ai → copy API key OR deploy yt-dlp on a \$4 VPS
3. n8n credentials: add Anthropic, Google Docs OAuth, Notion, Slack OAuth, Supadata Header Auth
4. Workflows → Import from Clipboard → paste JSON from page 4
5. Replace `REPLACE_ME_GDOCS_FOLDER_ID` and `REPLACE_ME_NOTION_DB`
6. Edit Claude prompt — drop your brand tone, target keywords, and asset templates
7. Trigger webhook with a YouTube URL → confirm blog doc, Notion rows, Slack ping → activate

Skill level: Beginner-to-intermediate. Webhook trigger + LLM parse, no code beyond pasting prompts.

COPY + PASTE

n8n workflow JSON

**Copy from GitHub →**

One click. Opens raw file with native copy button.

SCAN ON
MOBILE

Or import the file `08-youtube-transcript-9-assets.json` from the pack folder. In n8n: **Workflows** → **Import from Clipboard / File**.
