

CONTENT · AEO

FAQ → schema → WP REST inject

Drop a URL, Claude writes 6 keyword-grounded FAQs, builds valid FAQPage JSON-LD, and the WordPress REST API injects it into the post — no plugin, no editor.

THE PROBLEM

Most posts have zero AEO surface.

Search results are turning into answer cards. The pages that win are the ones with structured FAQ blocks tied to real query intent. Writing the FAQ, validating the schema, and pasting it into Yoast or a custom field is a 20-minute job per post. Across 80 indexed posts, that is a full week nobody books. The work itself is identical every time — exactly what a bot should own.

20m

MANUAL / POST

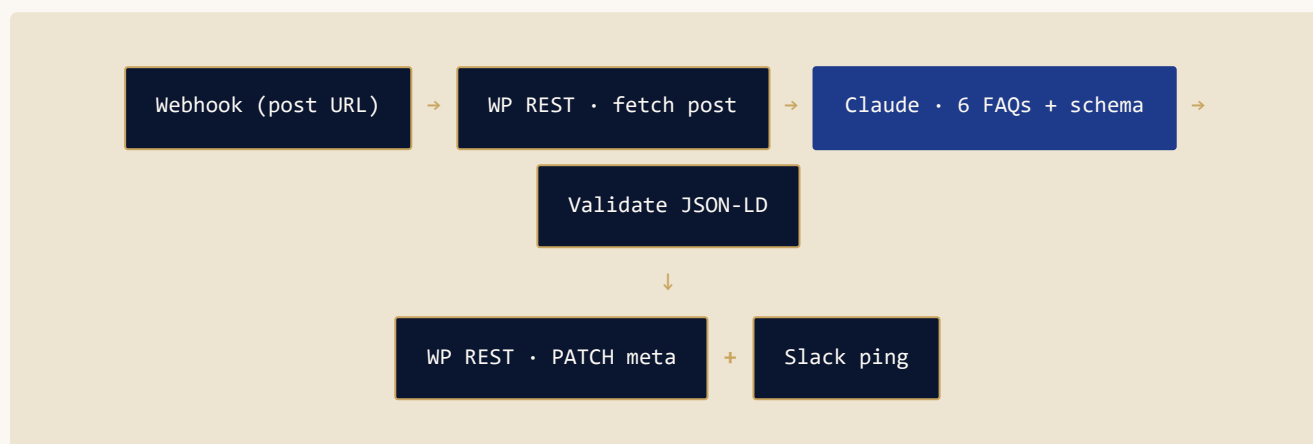

6

FAQS PER PAGE

Built for

- Bloggers with 50-500 indexed WordPress posts
- Agencies retrofitting AEO across client content libraries
- Founders pushing organic content for AI-search visibility (ChatGPT, Perplexity, Google AIO)

The flow

BUILD IT

Stack & setup

Tech stack

LAYER	TOOL	COST/MO
Orchestration	n8n (self-host / cloud)	\$6-20
WP access	WP REST API + Application Password	\$0
LLM FAQ + schema	Claude Sonnet 4.6	\$4-12
Alerts	Slack	\$0
Total	—	\$10-32

Before you import

- n8n instance (self-host DO \$6/mo OR n8n.cloud trial)
- WordPress 5.6+ with REST API reachable at /wp-json/wp/v2
- WordPress Application Password (Users → Profile → Application Passwords)
- Custom field `aeo_faq_schema` registered for the post type (ACF or register_post_meta)
- Anthropic API key with \$20+ credit
- Slack channel #aeo-injects + bot token

Setup (45-90 min fresh, 25 min if WP REST already exposed)

1. Spin up n8n: `docker run -d -p 5678:5678 n8nio/n8n` or n8n.cloud
2. In WP: Users → Profile → generate Application Password, copy username + token
3. Register `aeo_faq_schema` as a meta key in functions.php (or via ACF) with `show_in_rest=true`
4. n8n credentials: add WordPress Basic Auth, Anthropic API, Slack OAuth
5. Workflows → Import from Clipboard → paste JSON from page 4
6. Replace `REPLACE_ME_WP_BASE_URL` + edit the Claude prompt with your niche + tone
7. Hit the webhook with one post URL → verify the meta field updated + Slack confirms → activate

COPY + PASTE

n8n workflow JSON
