

PRODUCTIVITY · AGENCY

Meeting to Action Items to ClickUp

Drop a Zoom or Google Meet recording link. Claude listens, pulls action items with owner + due date, opens them as ClickUp tasks before the host closes their laptop.

THE PROBLEM

The meeting ends and the work disappears.

Six people on a 45-minute call. Eighteen action items. Nobody writes them down properly. The PM types a half-hearted recap from memory two hours later. Three tasks are missed. The client follow-up slips a week. You bought Fathom or Otter and still nobody pastes their summary into the project tool. Wire the recap directly into ClickUp the moment the call ends, with owners assigned by name.

SLIPPED ACTION ITEMS / YR

45 min

SAVED PER MEETING

Built for

- Agencies running 5+ client calls a week
- Product teams on ClickUp / Asana / Linear
- Founders who hate writing recap emails

The flow

BUILD IT

Stack & setup

Tech stack

LAYER	TOOL	COST/MO
Orchestration	n8n (self-host / cloud)	\$6-20
Transcript source	Fathom / Fireflies / tl;dv webhook	\$0-19
LLM extract	Claude Sonnet 4.6	\$2-6
Task target	ClickUp API (free tier)	\$0
Recap channel	Slack bot	\$0
Total	—	\$8-45

Before you import

- n8n instance reachable on a public URL (cloud or tunnelled)
- Fathom / Fireflies / tl;dv account with webhook on `recording_completed`
- Anthropic API key with \$10+ credit
- ClickUp API token + a list ID for the team inbox
- Slack channel #meeting-recaps + bot token
- A name to ClickUp user ID map saved in the Code node (8-12 teammates)

Setup (45-75 min fresh, 20 min if n8n is already wired)

1. Spin up n8n on a public URL (Hostinger VPS or n8n.cloud)
2. n8n credentials: add Anthropic API, ClickUp API token, Slack OAuth
3. Workflows → Import from Clipboard → paste JSON from page 4
4. Copy the webhook URL from the trigger node, paste into Fathom / Fireflies webhook settings
5. Replace `REPLACE_ME_CLICKUP_LIST_ID` with your team inbox list ID
6. Edit the name-to-userid map in the Code node (lines 4-12)
7. End a test call, confirm tasks land in ClickUp + recap lands in Slack, then activate

COPY + PASTE

n8n workflow JSON

Copy from GitHub →

One click. Opens raw file with native copy button.
