Loom Auto-Doc to Slack

Record a Loom. Five minutes later a polished SOP doc + checklist + summary lands in the right Slack channel. No manual write-up.

THE PROBLEM

Looms are easy to make and impossible to find.

You record a Loom explaining how the team should handle a new client onboarding. It saves you 30 minutes of writing. But three months later the doc still does not exist. New hires watch the same 12-minute video at 1.5x speed. Searches return zero hits because the transcript lives in Loom and the team lives in Notion or Slack. Wire Loom -> Claude -> formatted SOP -> Slack the moment recording finishes.

12 min

PER LOOM TO WRITE UP BY HAND

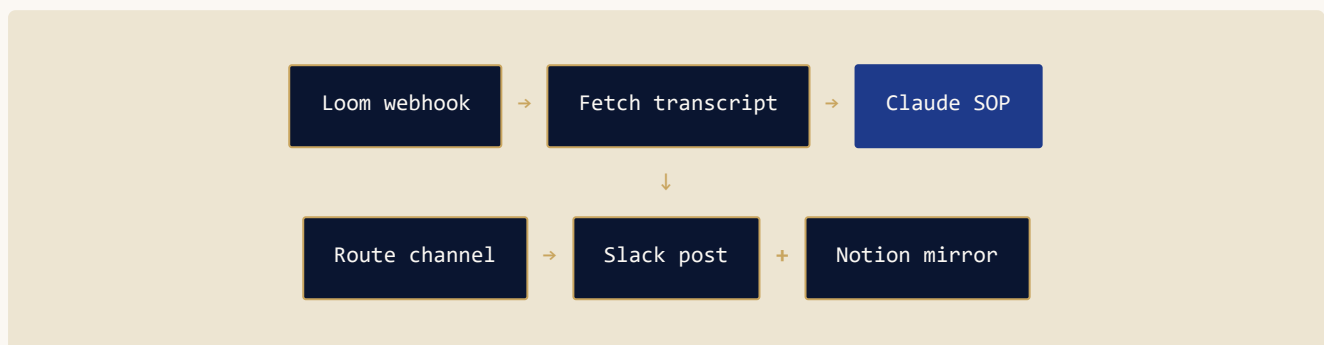

0%

LOOMS EVER TURNED INTO DOCS

Built for

- Agencies + studios where founders Loom over Notion docs
- Remote teams (5-30 people) on Slack
- Coaches building SOP libraries for VAs

The flow

BUILD IT

Stack & setup

Tech stack

LAYER	TOOL	COST/MO
Orchestration	n8n (self-host / cloud)	\$6-20
Video source	Loom Business webhook + API	\$15
LLM rewrite	Claude Sonnet 4.6	\$3-8
Delivery	Slack bot + Notion API	\$0
Total	—	\$24-43

Before you import

- n8n instance reachable on a public URL
- Loom Business or Enterprise plan (webhooks + transcript API)
- Anthropic API key with \$10+ credit
- Slack workspace + bot token (channels: #sop-onboarding, #sop-clients, #sop-misc)
- Notion integration token + a database called `SOP Library` with columns: Title, Owner, Tags, Source URL, Status

Setup (45-75 min fresh, 20 min if n8n is already wired)

1. Spin up n8n on a public URL (Hostinger VPS or n8n.cloud)
2. Loom workspace settings -> Webhooks -> add the n8n webhook URL, event = video.created
3. n8n credentials: Anthropic API, Slack OAuth, Notion API token (Header Auth), Loom API token
4. Workflows -> Import from Clipboard -> paste JSON from page 4
5. Replace REPLACE_ME_NOTION_DB_ID and the 3 Slack channel IDs in the Switch node
6. Edit the Claude SOP prompt to match your house style (sections, voice, examples)
7. Record a 60-second test Loom, verify Slack + Notion fire, then activate

Skill level: Beginner-intermediate. No code beyond pasting tokens.

COPY + PASTE

n8n workflow JSON

Copy from GitHub →

One click. Opens raw file with native copy button.
