

REAL ESTATE · LEAD GEN

Real Estate Listing → 5 Platforms

One Airtable row with photos + specs fans out to MLS-ready copy, Instagram carousel, Facebook Marketplace, Zillow blurb, and a single-listing landing page.

THE PROBLEM

Listing day eats 4 hours per property.

The agent does it manually every time. Rewrite the description for IG. Crop photos for FB Marketplace. Tweak the headline for Zillow's character limit. Push to MLS. Build a one-pager for the open house. By the time you finish, the listing is live everywhere with five slightly different stories. The buyer who searches you on Google sees inconsistent pricing. One Airtable row plus Claude plus a few APIs collapses this to 9 minutes.

4h

MANUAL LAUNCH PER LISTING

9 min

END-TO-END WITH THIS FLOW

Built for

- Solo agents and teams running 5-30 listings/mo
- Brokerages where the listing agent also does marketing
- Investor-flippers running 1-2 listings concurrently

The flow

BUILD IT

Stack & setup

Tech stack

LAYER	TOOL	COST/MO
Orchestration	n8n	\$6-20
Listing source	Airtable Pro	\$20
LLM rewriting	Claude Sonnet 4.6	\$4-10
Social posting	GoHighLevel social-posting API	\$0 if you have GHL
Landing pages	Webflow CMS or Vercel + static gen	\$0-29
Total	—	\$30-80

Before you import

- Airtable base with table `Listings` — fields: address, price, beds, baths, sqft, photos (attachment), status
- GoHighLevel sub-account with FB + IG connected (or substitute Buffer / Meta Graph API direct)
- Anthropic API key
- Webflow CMS collection `listings` OR a Vercel static site with a `/listings/[slug]` route
- Facebook Marketplace via Meta Graph API (or manual paste — flow generates copy + photo pack ready)
- n8n instance

Setup (75-120 min — Webflow CMS or Vercel route is the long pole)

1. Airtable → create Listings base with the 6 fields listed above
2. Get GHL location-level Private Integration Token (Settings → API → Private Integrations)
3. n8n credentials: Anthropic API, Airtable PAT, GHL bearer token, Webflow API token (optional)
4. Workflows → Import → paste JSON from page 4
5. Replace `REPLACE_ME_AIRTABLE_BASE`, `REPLACE_ME_GHL_LOCATION`, `REPLACE_ME_GHL_ACCOUNT_IDS` (FB + IG)

6. Add one test listing in Airtable, set status to `ready_to_publish`

7. Manual execute → verify IG carousel posts, landing page renders, Marketplace copy lands in your inbox

COPY + PASTE
